EXPERIENCE

Freelance Full-Stack Developer (Third-Party Contractor)

2026 – Present

Client Projects

Remote

- Delivered a full-stack production website for an aviation and flight-training client as a third-party developer, building the complete responsive frontend and backend end-to-end with **Next.js, React, and Node.js**.
- Structured the site around training programs, fleet information, instructors, and FAQs based directly on client requirements, and implemented technical and on-page **SEO** to improve search-engine crawlability and indexing.
- Integrated **Nodemailer** for automated contact-form email handling and built a custom **admin panel** for content and site management; currently developing additional client projects.

Vector Coder

06 2025 – 09 2025

Web Development Intern

Faisalabad, Pakistan

- Converted Figma designs into responsive **React** applications using reusable, modular components.
- Built an e-commerce app (product listings, cart, checkout UI), a weather app using geolocation APIs, and an AI chatbot powered by **Google Generative AI**.
- Used Git and GitHub for version control and collaborative development workflows.

PROJECTS

Food Mahel — Real-Time Multi-Role Food Delivery Platform

2025

- Built a full-stack platform supporting **Customer, Seller, Delivery Agent, and Admin** roles with JWT authentication and role-based access control.
- Implemented **real-time order tracking** with Socket.io/WebSockets for live delivery updates and instant notifications.
- Built semantic food search using **Hugging Face embeddings** with GeoJSON-based location filtering, and integrated **Neo4j** to model user-item relationships for personalized recommendations.
- **Tech:** React, Node.js, Express, MongoDB, Socket.io, Neo4j, Hugging Face, GeoJSON, Tailwind CSS

Additional Projects

- **BlogSpace** – SSR blogging platform with authentication, CRUD, likes, comments, and protected routes. Live · GitHub
- **AI Portfolio Builder** – RAG-enhanced portfolio generator built with the MERN stack, LangChain, and Google Generative AI. Live · GitHub
- **Talkify** – Real-time chat application with WebSocket messaging, authentication, and protected routes. GitHub
- **Angular & FastAPI Practice** – Built standalone-component Angular apps using signals, reactive forms, route guards, and HTTP services; built FastAPI REST APIs with Pydantic validation and JWT/OAuth2-protected endpoints.

OS Scheduling Simulator

2024

- Implemented FCFS, SJF, and Round Robin CPU scheduling algorithms in C++ with performance analysis. GitHub
